CDL Recycling Directory

Introduction and Definitions

The information in this guide will help you save money! Cut costs on your construction, remodeling or demolition project by recycling and reusing materials at job-sites. This guide includes:

- Definition of terms
- Setting up a job-site recycling program
- Quick guide to area recyclers
- Directory of area recyclers and reuse opportunities
- Listings of King County and Seattle disposal facilities

Questions?

- In **King County** call the King County Solid Waste Division at (206) 296-4466 or the King County Construction, Demolition and Landclearing (CDL) program at (206) 296-4407. You may also find answers to commonly asked questions on King County's website at <http://dnr.metrokc.gov/greenworks>
- In **Seattle** call the Business and Industry Recycling Venture hotline at (206) 389-7304 or visit the sustainable building portion of their website: www.seattlechamber.com/birv

Definition of terms

- **CDL:** The acronym CDL will be used throughout this guide. It stands for **C**onstruction, **D**emolition and **L**and-clearing material generated at job-sites.
- **Construction material:** Wood, concrete, drywall, masonry, roofing, siding, structural metal, wire, insulation and other building materials found at construction sites.
- **Demolition material:** Concrete, asphalt, drywall, carpet, wood, masonry, roofing, siding, structural metal, wire, insulation and other materials found in demolished buildings, roads and other structures.
- **Landclearing material:** Natural vegetation and minerals such as stumps, brush, blackberry vines, tree branches, associated dirt and sand, tree bark, sod and rocks.
- **Source separated:** CDL materials that are separated from other waste and planned for recycling.
- **Mixed CDL waste:** Contains both recyclable and non-recyclable CDL waste material that has not been separated. Recycling opportunities are limited for mixed loads of CDL.
- **D/O:** Drop Off – dropped off materials accepted, acceptance policies and fees may apply
- **P/U:** Pick Up – will pick up materials, acceptance policies and fees may apply

How to Use This Directory

This directory has listings by geographical area for quick reference.

- The **North** area covers the area north of Lake Washington and into Snohomish County.
- The **East** area covers the area east of Lake Washington to the County line
- The **South** area covers the area south of Lake Washington and south of the City limits of Seattle
- The **West** area covers the City of Seattle and the area west of Lake Washington.

No pricing information is included in this directory. Please call first to verify costs and service expectations.

We appreciate any feedback you may have on the directory. If you have comments please call (206) 296-4407 or email your comments to bill.smith@metrokc.gov.

Setting Up A Job-Site Recycling Program

Rising landfill fees have made disposal of construction, demolition and landclearing waste a significant expense. Reducing the amount of this material going for disposal lowers the cost of doing business.

Identify Recyclables

Asphalt, concrete, cardboard, drywall, metals and wood are easy to recycle in King County. Recycling options also exist for asphalt roofing, fluorescent lighting and carpet padding.

Choose a Recycling Method:

There are three basic approaches to job-site recycling.

❶ **Contract with a hauler** to transport materials to a recycler: There are two options here:

- Contract with the garbage hauler for the site to provide containers and hauling of both recyclables and garbage.
- Contract with a recycling hauler to provide container rental and hauling services. (If you choose this option, you may still need regular garbage service.)

❷ **Contract with a construction clean-up service** that comes on site and picks up recyclables and garbage that are collected in piles or containers. Materials are then taken to an appropriate recycling or disposal facility.

❸ **Self-haul.** Collect recyclable materials in piles or special containers at the job-site and haul them yourself to local processors and recycling drop-off facilities.

A combination of methods, such as self-hauling wood and contracting with a drywall recycler to provide a container and hauling services may be the best option for your project.

Select A Recycler

Specify in an agreement with the recycling service provider:

- What materials will be recycled
- Requirement that weight or volume of recyclables be documented
- Requirement that material will go to a properly permitted facility
- Costs associated with the service (fees for container rental, hauling, recycling charges)
- Schedule for picking up containers
- How containers will be labeled

Involve Subcontractors

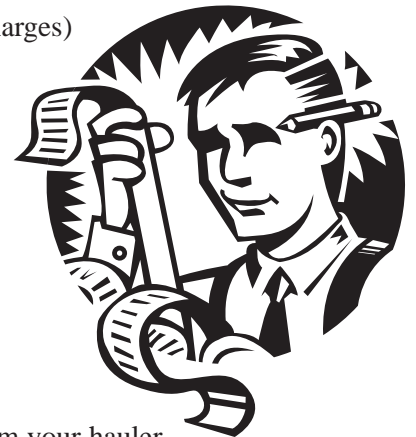

- Include language in sub-contractor agreements that they will recycle
- Discuss the recycling program at every safety meeting or other regular meetings

Monitor the Program

- Check dumpsters regularly to make sure material is getting separated properly

Determine Savings

- Calculate the cost savings from recycling versus disposal using documentation from your hauler.

For More Information on Preventing Waste and Recycling on the Job-site

The Contractors' Guide to Preventing Waste and Recycling, a companion to this *Construction Recycling Directory*, includes information on:

- Preventing Waste in the First Place
- Setting Up a Job-Site Recycling Program
- Making Your Program Work
- Designing Waste Management Plans and Specifications
- Using Recycled Content Building Materials
- Are There Dollars in Your Dumpster? – worksheets to calculate cost effectiveness of recycling

To receive this free guide, call the King County Solid Waste Division at (206) 296-4407 or in Seattle, the Business and Industry Recycling Venture at (206) 389-7304. This guide is also available on-line at <http://dnr.metrokc.gov/greenworks>

Case Study: King Street Center

First public-private development in King County builds “green” building.

Developer Wright Runstad, General Contractor Lease Crutcher Lewis, and Project Management from the King County Department of Construction and Facilities Management teamed up to create one of the largest sustainable buildings on the West Coast. Sustainable Building Practices consist of three major elements: Resource Conservation, Energy Efficiency and the preservation and enhancement of Environmental Quality. King Street excels in all three categories.

Resource Conservation

- Construction job-site recycling rate of 80% consisting of: 3,832 tons of non-rebar concrete; 2,351 tons of contaminated soil; 668 tons of granite; 136 tons of wood waste; and 44 tons of steel.
- Largest installation of re-used, renewed carpet tiles (32,000 yd² of Milliken “Earth Square”) in the U.S.
- All King County Metro bus riders may purchase monthly and yearly bus passes on the first floor.
- Designated bike room has rack space for 80 bikes to encourage clean commuting.
- Each floor’s elevator lobbies are test laboratories for numerous brands and types of recycled-content floor coverings and paints to test product performance.
- On-site water reclamation system collects stormwater from the roof and groundwater that would normally flow into sewer system and reuses the water for flushing toilets; this system will save an estimated 1.4 million gallons of domestic water annually.

Energy Efficiency

- Office placement maximizes use of exterior light through windows.
- Heating, Ventilating and Air Conditioning units reduce consumption through variable speed drives.

- Lighting is the most energy-efficient to date within Seattle, using a maximum .86 watts per square foot, 28.4% under code levels.
- Lighting system uses sweep sensors, occupancy sensors, and dimmers to reduce electricity use to correspond to daylight and workers on the job.

Environmental Quality

- Enhanced air filtration: roof-top HVAC air intakes provides 60% outside air filtration, which is about double what is more commonly used, resulting in better indoor air quality.
- Copy room exhaust: Stacked copy rooms in the building continually exhausted to the outside to eliminate particulates from copier toners.
- Low-Volatile Organic Compound paints, adhesives, furnishings, finishes, cleaning supplies used.

By participating in the building of King Street Center, King County is setting an example for builders, taxpayers and other local governments. Visitors and employees learn about the quality of recycled materials, and design and building professionals have a new standard for what can be accomplished-on time and on budget-while saving resources.

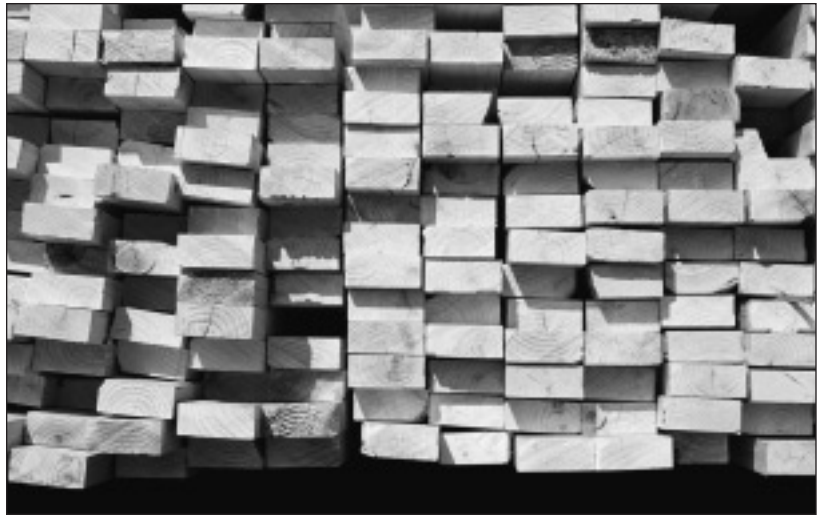

For more information on sustainable building practices and recycled content building materials visit our website at <http://dnr.metrokc.gov/greenworks> or call 206-296-4407.

Case Study: Boeing Commercial Airplane Group

Jobsite Recycling Record Set

Baugh Construction achieved an amazing 97% job recycling rate on its Boeing Commercial Airplane Group Headquarters project. Reaching this high rate took planning from beginning to end and Baugh's commitment to waste prevention and recycling is built into its business. Each project has a recycling plan which defines the goals, objectives and the company's commitment to that project. Frequent meetings keep all on-site personnel current with the plan and subcontractors stay in the loop through meetings and the establishment of on-site standards.

Materials Recycled

- Wood 64 tons
- Drywall 33.67 tons
- Concrete 6,401 tons
- Metals 39 tons
- Cardboard 1.5 tons
- Landclearing debris 8.3 tons

Recycled Content Building Materials Used

- Wood paneling was harvested from sustainable forests.

- Parking lot curbs, landscaping headers and pathways are made from recycled plastic
- Lobby countertops made from recycled newspaper

Summary

Baugh kept its commitment to the environment and in the process improved their bottom line by saving \$90,000. If you would like to learn more, visit our website at www.metrokc.gov/greenworks to view other case studies and get more information on job site recycling.

To view other Case Studies, visit the Green Works website at <http://dnr.metrokc.gov/greenworks>

Directory of Area Recyclers

This guide is a listing of area recyclers compiled from information provided to the King County Solid Waste Division and the Business and Industry Recycling Venture. It does not constitute a recommendation and may not be all-inclusive. Check local Yellow Pages for additional sources or call the Solid Waste Division at (206) 296-4466.

Note about listings: P/U – company will pick up materials at job site.

Wood

Mobile Services

The Clearing Company Inc	(206) 363-0144 (206) 909-6769	Offers land clearing and mobile grinding services.
D4 Care Construction and Recycling Enterprises 14821 Smokey Point Blvd, Marysville, WA	(360) 651-2336	Untreated, unpainted and unstained wood only. Pickup for large quantities.
Enviro-Waste Recyclers	(253) 852-2515 (206) 713-3898	Mobile chipping service.
Mann's Recycling & Construction NW Corner Highway 9 & 84th, above Marysville (transfer yard), Marysville, WA	(360) 658-1616	Accepts landclearing and clean, untreated wood. Offers tub grinding services.
Preferred Brush Chipping	(425) 271-6908	Mobile chipping service fir brush, tree limbs, etc, up to 4 inches in diameter.
Squak Mountain Materials, Inc 10430 Renton-Issaquah Rd SE, Issaquah, WA	(425) 392-1433	Accepts brush and stumps. No processed wood. P/U.
TWF Construction	(253) 852-3053	Accepts any woody material up to 8 inches in diameter for mobile chipping service.
Zellerhoff Construction, Inc 10120 SW 260th St, Vashon, WA	(206) 463-2074	Mobile wood grinding service. Landclearing material processed at job-site.

Where is Your Job-site Material Going?

King County and the City of Seattle require CDL materials be taken to properly permitted facilities. This applies to recycling and disposal. Permitted facilities comply with state and local regulations for material handling, operational and environmental controls and are inspected and monitored by regulatory agencies. To ensure your job-site material is being handled properly and not ending up in an illegal dump site, ask your hauler to provide you with a receipt for each trip.

Dirt/Soil

E.R.I. Network-Earth Recycling Inc. 704 228th Ave NE #104, Redmond, WA jobsiteoffice@netscape.net www.jobsiteoffice.com	(425) 836-8448 (425)836-8448	Offers a computer network service that includes fill dirt information on the use and export of dirt.

Mixed CDL Handling Facilities

Waste Management Eastmont 7155 West Marginal Way, Seattle, WA	(206) 762-3000	Accepts mixed loads of recyclable CDL materials.
Waste Management Auburn 701 Second St. NW, Auburn, WA	(253) 833-6861	Accepts mixed loads of recyclable CDL materials.

Isn't there a better way?

There is a better way... and it's online!

The Reusable Building Materials Exchange (RBME) is an easy way to list, advertise and exchange reusable building materials. Sponsored by both the King County Department of Natural Resources and the Energy Outreach Center in Olympia, the exchange is a practical tool for contractors and other businesses with construction waste as well as individual homeowners. Best of all, it's a FREE online service.

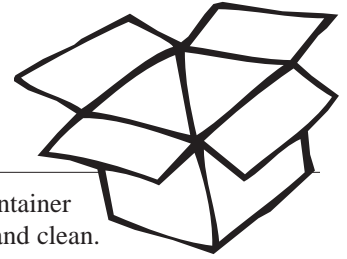

List carpeting, masonry, tile and yes... even lumber. Sell it, or simply save the costs of hauling it to the landfill. It's up to you.

REUSABLE BUILDING MATERIALS EXCHANGE

CDL Waste Disposal Facilities

CDL material that cannot be recycled must go to a permitted waste handling facility for disposal. The following facilities accept mixed CDL waste and waste that cannot be recycled.

King County Facilities

Non-recyclable CDL waste generated within King County can be disposed of at one of these facilities. Hours are subject to change, please call first to verify.

Regional Disposal Company facilities	(425) 646-2400	<i>Cash and Bank Card Customers (VISA/MC, No checks)</i>
Third & Lander Facility	2733 Third Avenue South, Seattle	Mon. thru Fri. 7:00am to 5:00pm; Sat. 8:00am to 3:30pm
Black River Facility	501 Monster Road SW, Renton	Mon. thru Fri. 8:00am to 6:00pm; Sat. 10:00am to 4:00pm
Waste Management of WA facilities	(206) 762-3000	
Eastmont Facility	7155 West Marginal Way, Seattle	Mon.–Thur. 6am–10pm; Fri. 6am–6pm; Sat. 8am–5pm
Argo Yard Facility	5000 Denver Avenue South, Seattle	Open 24 hours a day, seven days a week. <i>Intermodal container units only.</i>

NOTE: King County owned and operated transfer facilities do not accept commercial CDL wastes. Exemption is provided for private vehicles licensed for 8,000 pounds (standard pick-up truck) or less.

City of Seattle Facilities

Non-recyclable CDL waste generated within City of Seattle limits may be disposed of at one of the following facilities:

Regional Disposal Company facilities	(425) 646-2400	
Third & Lander Facility	2733 Third Avenue South, Seattle	Mon.–Fri. 7:00am to 5:00pm; Sat. 8:00am to 3:30pm
Waste Management of WA facilities	(206) 762-3000	
Eastmont Facility	7155 West Marginal Way, Seattle	Mon.–Thur. 6am–10pm; Fri. 6am–6pm; Sat. 8am–5pm
City of Seattle facilities	(206) 684-7600

South Recycling/Disposal Station	8100 Second Ave. S, Seattle	Mon. thru Fri. 8:00am to 5:30pm; Sat. 8:00am to 7:00pm; Sun. 9:00am to 6:00pm Hours are subject to change, please verify

CDL Acceptance Policy

Customers in private vehicles licensed for 8,000 pounds gross vehicle weight or less may dispose of CDL at King County transfer stations. Small amounts of CDL that are part of a large load of municipal solid waste will also be accepted. Materials may not be longer than 8 feet. Bulky items, such as concrete blocks, must be no greater than 2 feet by 2 feet in size as weigh less than 200 pounds. If pulling a trailer, total length from bumper to bumper should not exceed 25 feet.

Visit the Commission for Marketing Recyclable Materials web site **enCompass** at <http://dnr.metrokc.gov/market/encompass>. **enCompass** profiles buildings in the Puget Sound region built with recycled content construction materials.

Reporting Illegal Dumping

Contractors and haulers are responsible for delivering material to permitted refuse facilities. So, if you see illegally dumped material, we want to know about it. To report illegal dumping in the **City of Seattle**, call **(206) 684-PKUP** (684-7587), in **King County**, please call **(206) 296-8479** or **(206) 296-4722**.

Other important numbers for reporting:

- Spills or Dumpings – release of chemicals to the environment, call **(425) 649-7000**
- Hazardous Waste – mismanagement of hazardous wastes, call **(206) 263-3040**

Demolitions

All demolitions performed in King County require a permit from Puget Sound Air Pollution Control Agency (PSAPCA): **(206) 343-8800**. Demolitions performed in unincorporated areas of King County require a permit from the Department of Development and Environmental Services as well: **(206) 296-6600**. Prior to demolitions in the City of Seattle, call the Department of Construction and Land Use at **(206) 684-8850** for more information.

Construction Works

The Construction Works Program offers **assistance** and **recognition** to the building industry. Receive **free assistance** developing comprehensive construction waste management plans:

- information on recycling services to meet your job-site needs;
- resources on recycling job-site materials;
- strategies for preventing waste on the job-site; and
- information on products made from recycled materials

The **Construction Works Recognition Program** rewards companies for job-site recycling, preventing waste and using recycled content building products. Construction Works members will be recognized through:

- print advertisements and editorials in local papers and trade publications;
- media advertisements and public service broadcasts
- King County's *Recycling Works* newsletter, distributed to 27,000 business quarterly;
- The Business and Industry Recycling Venture's *Recyclerletter* newsletter distributed to 9,000 businesses quarterly
- inclusion in the annual Green Business Directory

For more information, call the Business and Industry Recycling Venture at (206) 389-7304 for projects located in Seattle and (206) 296-4407 for projects located in King County.

Please visit our website at <http://dnr.metrokc.gov/greenworks> for case studies, the Recycled Content Building Materials Guide and a listing of other resources.
